

Authors

This report was written by Sarah Gerritsen, Dr Niki Stefanogiannis and Yvonne Galloway, with statistical analyses conducted by Miranda Devlin, Robert Templeton and Li-Chia Yeh. The authors are employed by Public Health Intelligence, the epidemiology group of the Ministry of Health.

Acknowledgements

Thank you to the many thousands of New Zealanders who gave their time to participate in the New Zealand Health Survey. This report would not have been possible without your generosity.

The authors are very grateful to Professor Emeritus Robert Beaglehole, Professor Peter Davis and members of the New Zealand Health Survey Independent Monitoring Group (named below) for peer-reviewing this report. We are also indebted to the numerous colleagues at Public Health Intelligence and the Ministry of Health who commented on early versions of this report.

The 2006/07 New Zealand Health Survey would not have been possible without the support and enthusiasm of many individuals. The following people were instrumental to the survey.

Project management

Sarah Gerritsen and Dr Barry Borman (Public Health Intelligence).

Interview and data processing team

National Research Bureau Ltd, especially Andy Heinemann, Ken Sutton, Janette Simpson and the dedicated national office and field staff.

Sample design and methodology

Dr Robert Clark (University of Wollongong, Australia), Robert Templeton (Public Health Intelligence), Alistair Gray (Statistics Research Associates) and Larry Hill (National Research Bureau Ltd).
