	<i>Waited 8-12 weeks</i>					0
	<i>Waited >12 weeks</i>					0
	Total	0	0	0	0	0

Average wait from referral to treatment (weeks)

Notes :

1. The above is in respect of those starting treatment who had an FSA - on average 25% of treatments are retreats
These are not included in the above.
 2. A patient may be treated in more than one body area at a time in the above these are counted as 1 patient (unlike section B)
As this patient have have had only one referral to FSA
 3. As D categoried patients are in fact protocol and as such the wait is defined through the protocol these can have an effect on the average wait time from referral to treatment figure reported.
 4. A priority can change from FSA to Treatment and this can skew the times
 5. With low numbers of patients averages can be skewed by single issues
 6. January 04 delays in trt start time due to xmas period.
 7. Patients maybe delayed between decision to treat and treatment start date for reasons other that resource shortages
- Examples can include, awaiting hormone treatment, surgery recover etIII. These are not always identified and in some cases may be included the waiting time and subsequently skew some results. Wherever possible these delays are excluded.
