CLINICAL SERVICES LETTER No. 200

To Medical and Dental Practitioners
(Copy to Proprietors of Retail Pharmacies)

DRUG TARIFF 1979, Amendment No. 6: EFFECTIVE 1 APRIL 1981

This Clinical Services Letter will be the only record most will have of the present changes to the Drug Tariff. As it is not a cumulative list it is suggested that this Letter, along with earlier Clinical Services Letters, should be retained for reference purposes.

1. To be available from a retail pharmacy:

Additions—

Clotrimazole solution (Canesten)
Mucilaginous laxative dry (Metamucil)

Changed availability—

Mexiletine hydrochloride capsules (Mexitil)

2. To be available from a retail pharmacy on the prescription or recommendation of an appropriate specialist:

Addition—

Nifedipine capsules (Adalat)

Nifedipine is an expensive medicine. The Pharmacology and Therapeutics Advisory Committee suggested that we draw your attention to its high cost in comparison with alternative treatments. Nifedipine should not be used as the treatment of first choice. It is also included in the Intensified Adverse Drug Reaction Reporting Scheme and practitioners are requested to notify any adverse reactions or unexpected events associated with its use.

Changed availability—

Prednisolone tablets, enteric coated (Deltacortril)

3. To be available from a hospital pharmacy:

Addition—

Pivmecillinam hydrochloride tablets (Selexid)

4. Not to be available on a practitioners supply order:

Changed availability—

Chlorhexidine, its salts and esters.

LIBRARY
DEPARTMENT OF HEALTH
WELLINGTON

5. To be available only on a wholesale supply order:

Changed availability—

Metronidazole infusion (Flagyl).

6. To be available without the restriction "Approved condition":

Changed availability—

Norethisterone tablets 5 mg (Primolut N)

INTENSIFIED ADVERSE DRUG REACTION REPORTING SCHEME

The following medicines are included in the scheme:

Cimetidine (Tagamet).

Nifedipine (Adalat).

Perhexiline maleate (Pexid).

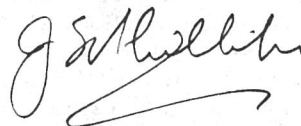

Sodium valproate (Epilim).

Sotalol hydrochloride (Sotacor).

REVISION OF THE DRUG TARIFF 1979

Consideration is being given to the deletion from the Drug Tariff of the products in the attached list. At first, it might appear that some important items are to be deleted. For example, adrenaline appears in the attached list. The salts of adrenaline used in the solution and injection, however, will remain in the Drug Tariff.

In many cases the items are no longer available on the New Zealand market, whilst usage of others appears to be minimal. This list will be referred to the Pharmacology and Therapeutics Advisory Committee when it meets on 15 April. If you consider that any of these items should be retained, we should appreciate your comments before that date for referral to the Committee.
